

FinAware — Data Model

All 14 tables in the one SQLite database, with every column, its type and its keys, drawn from prisma/schema.prisma. Lines join a foreign key to the row it belongs to; the tag on each table names who writes it.

How to read this diagram

Orange box People and credit Green box Help and AI Purple box Risk and money

→ Foreign key: many (*) or 0..1 → one (1)

--> Looked up by value — no foreign key

Dashed box Worth knowing

Column marks: PK primary key (bold) · FK foreign key (blue) · UQ unique · Type? may be empty · the tag on each table names the service that writes it
